Kaleidoscope flextangle template

Here is a demonstration that I created in class using street art I photographed in Brooklyn. As you can see below the sections need to correspond to work properly as a 3D object. Each student should use ORIGINAL images (your photographs) or drawings to create a creative flextangle in Photoshop one layer at a time. When you are finished be sure to use the text tool and add your name in as well the we will print them out and assemble them in class later in the week. The last step is to follow the steps on the template and make it a 3D object which will be graded on Wednesday 1/17 The demonstration I made in class using photographs of street art that I took at 5 Pointz in Queens can be seen above, think of a fun and interesting way that you can design a flextangle that reflects your interests! \$0+ Join in the Pokemon Evolution Papercrafting fun! Make these Kaleidocycles (also called Flextangles) and see how 4 of our most favorite Pokemon characters change and develop!Download EEVVEE and SQUIRTLE as a Kaleidocycle HERE!This OFFER now also includes the EEVVEE ARTIST EDITION (as seen in the video)!THIS IS A FREE OFFER - simply type in 0 to grasp the coloring page! Sold out, please go back and pick another option. 320 ratings5 stars 87%4 stars 7%3 stars 2%2 stars 1%1 star 3% With the Etsy Global Craft Party on this weekend, I wanted to share these printables and tutorial to make an amazing kinetic paper kaleidocycle. A kaleidocycle is an easy-to-make folded paper toy that you can rotate and manipulate. It also makes a really lovely geometric sculpture, which you can use as a decorative object in your home. Download the bright kaleidocycle here. Download the pastel kaleidocycle here. Download the blue watercolour kaleidocycle here. Download the kaleidocycle template here. This printable is an outline, so you can colour it in yourself. Print out and then cut out the kaleidocycle. I had mine printed at Officeworks on gsm semi gloss paper, and the result is lovely and bright. You can print it out on standard office paper too. Using the ruler and bone folder, or the blunt end of the needle, gently score along the vertical and diagonal lines of the kaleidocycle. The bottom of the kaleidocycle has a straight edge made up of three triangle tabs. The top has a zig-zag edge made up of three diamonds. Curve the kaleidocycle around so the two ends come together, then glue the second tab into the opening of the opposite end. Hold it together until the glue is dry. And now your kaleidocycle is complete. Try printing out a few copies of the template and colour them and add patterns. Let us know how you go with making your own kaleidocycles. Please tag us and craftparty so we can see all of your amazing creations. Want more paper kaleidoscope craft inspiration for the Etsy Craft Party? Click here for loads of ideas and more tutorials. Trihexaflexagon Classic. This is the classic 3 faced hexaflexagon. This template is created to be easy to cut out, glue and fold up. This fresh design has been nicely labeled to best show off the mathematical properties of the flexagon. Everyone should make one of these! This flexagon is not nearly as widely known and folded, but it is almost as easy to cut out and fold up as the classic. The four faces provide opportunity for design creativity. A well folded model will flex very smoothly with well formed faces. Hexahexaflexagon Variation A. Be sure to check this one out - It is a celebration of all 6 hexaflexagons with 6 or less faces."Flextangles"/How To Make: Flextangles - DIY Paper Toys/Magic toyHexahexaflexagon Variation B. Hexahexaflexagon Variation C. The Snake Heptahexaflexagon Variation A. Template for the B and C variations of the 7 faced heptahexaflexagon. Both variations are folded from the same template. Within each folded variation, you can see the faces of the other variation. Be sure to check out the "G" and Sunday face on both variations. Challenge - Can you V-flex from one variation to the other?How to Make Flextangle! This is the hexaflexagon with the smallest number of faces that will fold up into two flexagons with different Tuckerman state diagrams.A Wrinkle in Time is visually stunning! In the movie you see Meg flipping an origami paper toy craft with a heart on it. This is a Kaleidocycle Flextangle and I've made one to look like the one in the movie for you to print and play with! Meg's flextangle has a small heart and a big heart as two of the designs. The Kaleidocycle Flextangle template is hand drawn to make it look like the one in the movie so make sure you print it in color! After all, love prevails in the universe! The movie was beautiful. I couldn't tear my eyes away from all the beautiful costumes and hair. I'm normally one of those people that reads the book before seeing a movie but I haven't in this case. Ava DuVernay brings this interesting story to life and shows every child that no matter their faults, you can find the light inside of you. This dress that Mindy Kaling wore has the quotes that she says in the movie printed on them. Her basket weave hair makes me think about how long it took to make. Hixvision request refuse cgi integrate function is disabled! love the amazing women they cast for this film. Her transformation on screen was perfection.Vitamin K2 miracleNow for some fun printables! I have a couple of fun printables to share with you today. The first is the flextangle template and the other is a collection of color pages and activity sheets courtesy of Disney! Just click on the image below to open the activity sheets in a new window where you can print or save them to your computer. It works better and will last much longer. Regular printer paper will work as well. A Wrinkle in Time Kaleidocycle Flextangle. Your email address will not be published. Recipe Rating.I have been asked a number of times what pens we use and have I am NOT being paid to promote these, we genuinely love our set — we have this set from Faber Castell, they are brilliant and I highly recommend them! US Readers. UK Readers. Thanks so much for these great templates..... Also they are not really difficult to make after watching your video on youtube. Print, colour, [...]. Recipe Rating. Save my name, email, and website in this browser for the next time I comment. Sooo we have one last fabulous little printable in time for Christmas for you.... These Winter Paper Toys were first shared in Dec and have been updated and republished for your convenience! We have also have these Flextangle designs on following websites: Did you like this? Share it:. Comments This looks like fun! We will give it a go with our kids. Thanks Bec. These flextangles are so much fun!! Thanks again. Ok Read more.Learn how to make a flexagon, a most fascinating geometric toy! It looks like an ordinary paper hexagon with a front and a back, but hidden inside is a third side or face that can be brought to the outside by flexing the paper. Flexagons are folded paper polygons that have the neat feature of changing faces as they are flexed. There are many types of flexagons. The names of flexagons tell the type of polygon and the number of faces.In this project we make a tri-hexaflexagon—a six-sided polygon hexagon with three faces tri. Related crafts: Make a Hexa-hexaflexagon—it has six faces! Flexagons were discovered over fifty years ago by a graduate student, Arthur Stone, playing with scraps of paper. The first flexagon he made was the tri-hexaflexagon. He had folded a strip of paper diagonally in three places to form a hexagon. When he flexed the hexagon in a certain way, a third face was revealed. He found this to be very interesting. After thinking about it overnight, he constructed a hexagon that when flexed produced six different faces— hexa-hexaflexagon. After that many of his friends joined him in the fascinating study of flexagons, and many more types of flexagons were discovered. Choose a tri-hexaflexagon to make.Free Printable: Make a folding paper KaleidocycleDownload and print the pattern. You might want to start with the pattern with numbers on each face—1, 2 and 3. The Dots pattern coordinates with the dot patterns in the Geometric Solids craft project. On the Stars pattern, half of the fold lines are marked on each side, so you will need to score on both sides. It's best to make another pattern first for experience in scoring and folding. On the Equilateral triangle patterns, the fold lines are thicker than the lines for the individual, smaller triangles. Patterns are Adobe PDF files.Gabar yar oa la wasayoThe Adobe Reader is available for free.
